

ABDELRAZEK ELSAIED BADR

Software Engineering Technical Lead | Software Architect | Odoo & Full-Stack Engineering

New Mansoura City, Egypt • +20 101 413 4331 • abdelrazek.orcl@gmail.com

[linkedin.com/in/abdelrazek-e-badr-13663558](https://www.linkedin.com/in/abdelrazek-e-badr-13663558) • abdelrazekbadr.github.io/my_profile_web

Career Progression: Software Developer → Software Engineer → Senior Software Engineer → Software Architect → Technical Team Lead

PROFESSIONAL SUMMARY

Software Engineering Technical Lead and Software Architect with 15+ years of experience progressing from hands-on development to enterprise architecture and technical leadership. Specialized in Odoo ERP (v15–v19) techno-functional delivery, Python, B2B e-commerce, React/Next.js, enterprise integration, and cloud-native DevOps.

Delivered enterprise platforms to 10 major clients across Egypt and Saudi Arabia, including national ministries, Saudi Telecom Company, and King Saud University. Currently leads a distributed engineering team of 4–8 full-stack engineers, owning solution architecture, release strategy, and sprint delivery, with growing application of AI and workflow automation.

CORE COMPETENCIES

Technical Leadership • Software Architecture • Solution Architecture • Odoo ERP & Techno-Functional Delivery • B2B E-Commerce • Enterprise Integration • System Design • Agile / Scrum • Team Mentoring • Code Review • Stakeholder Management • CI/CD & DevOps • Release Management • Technical Documentation

TECHNICAL SKILLS

ERP & Backend Odoo ERP (v15–v19, Community & Enterprise) — custom addons, ORM, models, controllers, security rules, wizards, QWeb reports, scheduled actions; Python, Flask, RESTful API design; B2B commerce and financial/accounting workflows; MVC / MVVM / SOA / OOP design patterns.

Frontend & Web Next.js, React, TypeScript, JavaScript (ES6+), Odoo OWL, Tailwind CSS, shadcn/ui, Redux Toolkit, Zustand, TanStack Query, i18n (next-intl / i18next).

Mobile React Native, Expo, Flutter, Firebase, Ionic, Swift (iOS), Kotlin (Android).

Cloud & DevOps Azure DevOps, Odoo.sh multi-environment release topology, Docker & Docker Compose, GitHub Actions, Git & submodules, Portainer, Traefik, Nginx Proxy Manager, Vercel, Linux administration, Prometheus / Grafana / Loki.

Databases & Integration PostgreSQL, Supabase, Microsoft SQL Server, Oracle; IoT and biometric hardware integration (Suprema devices, BioStar2 API); e-invoicing and tax compliance (Saudi ZATCA, Egyptian Tax Authority).

AI & Automation Agentic AI (CrewAI), RAG and vector search (Supabase pgvector, HuggingFace embeddings), LLM integration (LiteLLM, Google GenAI), workflow automation (n8n, Make.com), AI-assisted software engineering.

Earlier-Career Stack C# / .NET, ASP.NET, WinForms, WCF, Silverlight, ADO.NET, Entity Framework, DevExpress XPO / XAF, Windows Services.

SELECTED ENTERPRISE CLIENTS

Ministry of Interior (KSA) • Ministry of Economy and Planning (KSA) • Saudi Telecom Company (STC) • King Saud University • SAMTIA (KSA) • adv-photonx (KSA) • BinRush Ophthalmic Center / Ibn Rushd Medical Group • Kafr El-Sheikh University

PROFESSIONAL EXPERIENCE

LAPLACE SOFTWARE — Egypt / USA | 2014 – Present

Primary employer; assigned as a dedicated engineering resource to partner organizations delivering enterprise solutions to government entities, ministries, and large institutions across Saudi Arabia and Egypt.

Technical Team Lead / Software Architect | Remote (Egypt) | 2025 – Present

Team & Hiring

- Lead a distributed engineering team of 4–8 full-stack engineers across frontend, React Native, Odoo, and QA; own hiring, onboarding, and performance management.
- Established engineering standards, code review practice, and delivery accountability across all disciplines.

Architecture & Delivery

- Own architecture and delivery of SAMTIA, an Odoo-based B2B e-commerce platform serving enterprise buyers through a Next.js customer portal and an Account Manager Portal.

- Designed role-based access control, pricelist management, and account-level reporting; own core B2B financial and accounting workflows within Odoo.

Release & Reliability

- Designed and standardized a five-environment Odoo.sh release topology across two engineering teams — development, regression, UAT, and production — automated with GitHub Actions and coordinated through Azure DevOps sprint delivery.
- Resolve production-critical issues across the platform, including a WebSocket frame-ordering fault affecting the client portal, and drive post-incident analysis and system hardening.

Process & Tooling

- Introduced a weighted performance evaluation framework for the distributed team, and integrated AI-assisted development and workflow automation tooling (LLM, CrewAI, n8n) into daily delivery and reporting.

Senior Software Engineer → Software Architect / Team Lead | On-site, Kingdom of Saudi Arabia | 2015 – 2025

Seconded on-site under Qwaed Technologies and Genius Valley (KSA), delivering to national ministries, telecom, and university clients.

Career Progression

- Advanced from Senior Software Engineer (2015–2020) to Software Architect (2020–2023) to Technical Team Lead (2023–2025), moving from feature delivery to architecture ownership and technical direction across concurrent enterprise engagements.

Architecture & Delivery

- Led architecture and delivery of enterprise systems for the Ministry of Interior, the Ministry of Economy and Planning, Saudi Telecom Company (STC), and King Saud University — spanning document management, visitor management, access control, and time & attendance.
- Delivered a biometric time and attendance platform for King Saud University covering 10,000 employees across 300 fingerprint devices, and an equivalent system for STC serving 500 employees across 50 devices.
- Designed and packaged the Access Management System (AMS) suite on Odoo — modular addons for visitor management, access control, time & attendance, MDU, secretary workflow, and IoT school sound systems — with a Docker-based client release pipeline.
- Built and published a Saudi ZATCA e-invoicing compliance module on the Odoo App Store, reaching 5,880 downloads, alongside an Egyptian Tax Authority compliance integration.

Stakeholder & Client Engagement

- Ran client requirements workshops and on-site UAT in Arabic and English with government and enterprise stakeholders, managing scope, defects, and acceptance criteria.
- Bridged business and engineering teams, presenting technical trade-offs and delivery roadmaps to executive and operations leadership.

Technical Leadership & Modernization

- Led the delivery-stack migration from legacy C#/.NET and DevExpress XAF to Odoo/Python and modern JavaScript, establishing architecture standards and code review culture.
- Mentored engineers on Odoo ORM, Python, and modern web architecture, and designed reusable IoT integration patterns for Suprema biometric devices via the BioStar2 API.

Software Engineer | Egypt | 2014 – 2015

- Built enterprise products in C#/.NET with DevExpress XAF and SQL Server under MVVM patterns, including a university laboratory system (Kafr El-Sheikh University), stock management, and property management platforms.
- Gathered requirements directly from academic and operational stakeholders and delivered data-driven inventory, academic workflow, and asset management features.

ACS (Branch of KSA-based Group) — Egypt | 2013 – 2014

Software Engineer

- Developed modules of an enterprise healthcare system using C#, Silverlight, WCF, and Oracle under an MVVM architecture, building clinical and administrative workflow interfaces.
- Implemented service-oriented integration patterns over WCF against Oracle enterprise data models supporting healthcare domains.

GENIUS MAKING CENTER ACADEMY — Egypt | 2010 – 2013

Software Developer | 2012 – 2013

- Built educational applications focused on children's skill development — 2D educational games, interactive learning tools, and administrative systems — in C#/.NET with SQL Server.

- Owned full delivery across UI, business logic, database design, deployment, and client support.

Software Developer | 2010 – 2011

- Delivered desktop and data-driven C#/.NET and SQL Server applications for education and medical-training clients, from requirements gathering through deployment and support.
- Built a Face Recognition System in C# with specialized recognition libraries as a graduation project, and became an IEEE contributor through this work.

Programmer — Republican Guard, IT & Operations Department (Military Service) | 2011

- Developed panorama applications, tracking systems, and internal IT applications supporting operational activities.

SELECTED PROJECTS

SAMTIA — B2B E-Commerce Platform (SAMTIA, KSA) | Software Architect & Team Lead | 2025 – Present

Odoo 18/19, Python, Next.js, TypeScript, PostgreSQL, Odoo.sh, Azure DevOps, Docker, GitHub Actions

Architected an Odoo + Next.js B2B commerce ecosystem integrating ERP, buyer portal, account-manager operations, pricing, orders, permissions, and reporting — delivered through a five-environment Odoo.sh release pipeline across two engineering teams. Current flagship platform and primary architecture ownership.

Access Management System (AMS) Suite | Software Architect & Team Lead | 2024 – 2025

Odoo, Python, OWL, JavaScript, PostgreSQL, React Native, Docker, BioStar2 API

Productized a modular Odoo suite (ams_base, ams_bs, ams_vm, ams_mep, OTP login) covering visitor management, access control, time & attendance, MDU, and IoT school sound systems, packaged with a Docker-based release pipeline and Suprema biometric integration.

Electronic Medical Record — BinRush Ophthalmic Center, KSA | Software Architect & Team Lead | 2020 – 2023

Odoo, Python, JavaScript, OWL, HTML5, Bootstrap, PostgreSQL

Delivered a specialist ophthalmic EMR platform covering outpatient and inpatient clinical workflows, patient records, and reporting, with insurance claim processing integrated through the Saudi NPHIES national health information exchange.

Document & Task Management iPad Applications — Ministry of Interior, KSA | Software Engineer & Team Lead | 2020 – 2023

C#, .NET, WCF, DevExpress XAF, Ionic + Angular, SQL Server, iOS

Delivered a secure iPad document circulation and task management system for ministerial executive leadership, backed by a WCF service layer and enterprise identity controls.

Tayabat — Nutrition Mobile Application | Lead Engineer (Independent) | 2025 – 2026

React Native, Expo, Supabase, Zustand, Next.js, Vercel, Firebase, GA4

Built a consumer nutrition application end to end as a personal engineering project — mobile client, Supabase backend, Next.js marketing site, analytics, and Play Store release assets.

AI Automation & RAG Workflow Platform | Lead Engineer (Independent) | 2025 – 2026

n8n, CrewAI, LiteLLM, Supabase pgvector, HuggingFace, Evolution API

Developed multi-agent automation workflows including a WhatsApp/Telegram AI assistant with calendar integration, and a retrieval-augmented document ingestion pipeline over a vector database.

EDUCATION

Professional Diploma, Software Development (9-Month Program)

Information Technology Institute (ITI), PSD Department — Egypt | 2013

Pre-Master's Studies, Computer Science

Mansoura University — Egypt | 2012

Bachelor of Computer and Information Systems, Computer Science

Mansoura University — Egypt | 2010 | Final-year grade: 90%

PROFESSIONAL DEVELOPMENT & LANGUAGES

Certification AI Automation Certificate — Dotpy Academy (2-month program): prompt engineering, n8n workflow design, and no-code AI tooling.

Languages Arabic — Native | English — Professional working proficiency.
