ABDELRAZEK ELSAIED BADR

Technical Project Manager | Technical Lead & Software Architect | Agile / Scrum | ERP & Enterprise Applications

New Mansoura City, Egypt • +20 101 413 4331 • abdelrazek.orcl@gmail.com

LinkedIn: linkedin.com/in/abdelrazek-e-badr-13663558 • Portfolio: abdelrazekbadr.github.io/my_profile_web

PROFESSIONAL SUMMARY

Technical delivery leader with 15+ years in enterprise software, combining project execution with hands-on architecture across ERP, B2B e-commerce, government, telecom, healthcare, and higher education in Saudi Arabia and Egypt. Leads distributed teams of 4–8 engineers across web, mobile, Odoo, and QA, running requirements workshops, sprint delivery in Azure DevOps, UAT, release management, and production issue resolution.

Translates business requirements into technical solutions and delivery roadmaps for executive stakeholders. Delivered enterprise systems for the Ministry of Interior, STC, and King Saud University, including biometric attendance for 10,000 employees, and a ZATCA e-invoicing module with 5,880 Odoo App Store downloads.

SKILLS

Project & Delivery Management: Agile / Scrum, sprint delivery (Azure DevOps), requirements workshops and analysis, scope and acceptance-criteria management, stakeholder management, UAT, release management, defect and incident management, post-incident analysis, technical roadmaps

Team Leadership: Hiring, onboarding, performance management, mentoring, code review, engineering standards, distributed teams across time zones

Technical Expertise: Software architecture, system design, Odoo ERP (v15–v19), Python, React, Next.js, TypeScript, React Native, PostgreSQL, REST APIs, enterprise integration

Delivery Tooling & Cloud: Azure DevOps, GitHub Actions, CI/CD, Docker, Odoo.sh multi-environment releases, Vercel, Linux

Domains: ERP, B2B e-commerce, government, telecom, healthcare (NPHIES), higher education, e-invoicing compliance (ZATCA, Egyptian Tax Authority)

AI & Automation: AI-assisted delivery and workflow automation (LLM integration, CrewAI, n8n)

PROFESSIONAL EXPERIENCE

LAPLACE SOFTWARE — Egypt / USA — 2014 – Present

Primary employer; assigned as a dedicated engineering resource to partner organizations delivering enterprise solutions in Saudi Arabia and Egypt.

Technical Team Lead / Software Architect — Remote (Egypt) — **2025 – Present**

Placed with SAMTIA and Advanced Photonix (KSA) — B2B e-commerce platform on Odoo ERP and Next.js

- Own end-to-end delivery and architecture of **SAMTIA**, a B2B e-commerce platform serving enterprise buyers through a Next.js customer portal and an account manager portal on Odoo ERP.
- Coordinate a distributed team of **4–8 engineers** across frontend, React Native, Odoo, and QA, working across Egyptian and Saudi time zones; own hiring, onboarding, performance management, and delivery accountability.
- Run sprint delivery through **Azure DevOps** across two engineering teams, translating business requirements for pricing, permissions, orders, and account-level reporting into delivered features.
- Standardized a multi-environment **release process** on Odoo.sh — development, regression, UAT, and production — automated with GitHub Actions, giving both teams one consistent path to production.
- Lead production incident response, including a WebSocket frame-ordering fault in the client portal, and run post-incident analysis that feeds process and system hardening.
- Introduced a weighted performance evaluation framework and AI-assisted development and automation tooling (LLM, CrewAI, n8n) into daily delivery and reporting.

Senior Software Engineer → Software Architect → Technical Team Lead — On-site, KSA — **2015 – 2025**

Placed under Qwaed Technologies and Genius Valley, delivering to their ministry, telecom, university, and healthcare clients. Senior Software Engineer (2015–2020) → Software Architect (2020–2023) → Technical Team Lead (2023–2025).

- Led delivery and architecture across concurrent enterprise engagements for the **Ministry of Interior, Ministry of Economy and Planning, STC, and King Saud University** — document management, visitor management, access control, and time & attendance.
- Ran requirements workshops and on-site **UAT in Arabic and English** with government and enterprise stakeholders, managing scope, defects, and acceptance criteria through to sign-off.
- Presented technical trade-offs and **delivery roadmaps to executive and operations leadership**, bridging business stakeholders and engineering teams.
- Delivered biometric time and attendance platforms at scale: **10,000 employees across 300 devices** for King Saud University and **500 employees across 50 devices** for STC.
- Packaged the **Access Management System (AMS)** as a suite of modular Odoo products with a Docker-based client release pipeline for deployment to multiple clients.

- Built and published a **Saudi ZATCA e-invoicing module** on the Odoo App Store with **5,880 downloads**, plus an Egyptian Tax Authority compliance integration.
- Led the delivery-stack migration from legacy C#/.NET and DevExpress XAF to Odoo/Python and modern JavaScript, setting architecture standards, code review practice, and mentoring engineers through the transition.

Software Engineer — Egypt **2014 – 2015**

- Delivered enterprise products in C#/.NET, DevExpress XAF, and SQL Server — a university laboratory system for Kafr El-Sheikh University, plus stock and property management platforms — gathering requirements directly from academic and operational stakeholders.

Earlier Career **2010 – 2014**

- **ACS (KSA-based group), Software Engineer — 2013–2014:** enterprise healthcare system modules in C#, Silverlight, WCF, and Oracle.
- **Genius Making Center Academy, Software Developer — 2010–2013:** educational applications and administrative systems in C#/.NET and SQL Server, owning delivery from requirements to client support.
- **Republican Guard IT & Operations (military service), Programmer — 2011:** panorama, tracking, and internal IT applications.

SELECTED PROJECTS

SAMTIA — B2B E-Commerce Platform (KSA) | Delivery & Architecture Lead **2025 – Present**

Objective: give enterprise buyers and account managers one digital channel for pricing, ordering, and account operations on Odoo ERP. Own delivery across two engineering teams, from requirements through a multi-environment release pipeline to production support. Stack: Odoo 18/19, Python, Next.js, TypeScript, PostgreSQL, Azure DevOps, GitHub Actions.

Access Management System (AMS) Suite | Architect & Team Lead **2024 – 2025**

Objective: turn repeated client builds for visitor management, access control, and time & attendance into reusable Odoo products. Led the team that productized the modular suite with Suprema biometric integration and a Docker-based release pipeline for client deployments.

Electronic Medical Record — BinRush Ophthalmic Center (KSA) | Architect & Team Lead **2020 – 2023**

Objective: digitize outpatient and inpatient ophthalmic workflows and insurance claims. Led delivery of a specialist EMR on Odoo with patient records, reporting, and claims integrated through Saudi Arabia's NPHIES national health exchange.

Document & Task Management — Ministry of Interior (KSA) | Software Engineer & Team Lead **2020 – 2023**

Objective: secure document circulation and task tracking for ministerial executive leadership. Delivered iPad applications backed by a WCF service layer and enterprise identity controls.

SELECTED ENTERPRISE CLIENTS

Ministry of Interior (KSA) • Ministry of Economy and Planning (KSA) • Saudi Telecom Company (STC) • King Saud University • SAMTIA (KSA) • Advanced Photonix (KSA) • BinRush Ophthalmic Center / Ibn Rushd Medical Group • Kafr El-Sheikh University

EDUCATION & CERTIFICATION

AI Automation Certificate — Dotpy Academy | 2-month program: prompt engineering, n8n workflow design, no-code AI tooling

Professional Diploma, Software Development (9 months) — Information Technology Institute (ITI), Egypt | 2013

Pre-Master's Studies, Computer Science — Mansoura University, Egypt | 2012

BSc, Computer and Information Systems — Mansoura University, Egypt | 2010 • Final-year grade 90%

LANGUAGES

Arabic — Native • English — Professional working proficiency
