PROFESSIONAL SUMMARY

Full-Stack Software Architect and Technical Lead with 15+ years of experience leading enterprise web, mobile, and ERP delivery across B2B e-commerce, healthcare, government, and telecom. Specializes in Python/Odoo, React/Next.js, TypeScript, PostgreSQL, API design, CI/CD, and production reliability, with proven ownership of architecture, team leadership, and scaled delivery.

Currently own architecture for SAMTIA, an Odoo + Next.js B2B platform, and lead a team of 4–8 engineers. Delivered platforms for Saudi ministries, STC, and King Saud University, including biometric attendance for 10,000 employees and a ZATCA module with 5,880 downloads.

TECHNICAL SKILLS

Architecture: Software architecture, system design, enterprise integration, REST APIs, SOA, MVC / MVVM, design patterns

Full Stack: End-to-end product delivery across web, mobile, and ERP: Python / Odoo, React / Next.js, PostgreSQL

Backend: Python, Odoo ERP v15–v19 (ORM, controllers, security rules, QWeb, wizards, scheduled actions), Flask

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Odoo OWL, Tailwind CSS, Redux Toolkit, Zustand, TanStack Query

Mobile: React Native, Expo, Flutter, Ionic, Firebase, Swift (iOS), Kotlin (Android)

Databases: PostgreSQL, Microsoft SQL Server, Oracle, Supabase

DevOps & Cloud: Azure DevOps, GitHub Actions, CI/CD, Docker / Compose, Odoo.sh, Vercel, Linux, Traefik, Portainer, Grafana

Integrations: REST APIs, Suprema BioStar2 & IoT devices, Saudi ZATCA, Egyptian Tax Authority, NPHIES

AI & Automation: LLM integration (LiteLLM, GenAI), CrewAI, RAG / pgvector, n8n, Make.com, AI-assisted engineering

Leadership: Team leadership, mentoring, hiring, code review, Agile / Scrum, release management, stakeholder management

Earlier-Career Stack: C# / .NET, ASP.NET, WCF, WinForms, Silverlight, Entity Framework, DevExpress XPO / XAF

PROFESSIONAL EXPERIENCE

LAPLACE SOFTWARE — Egypt / USA — 2014 – Present

Primary employer; assigned as a dedicated engineering resource to partner organizations delivering enterprise solutions in Saudi Arabia and Egypt.

Technical Team Lead / Software Architect — Remote (Egypt) — **2025 – Present**

Placed with SAMTIA and Advanced Photonix (KSA)

- Own architecture and delivery for **SAMTIA**, an Odoo-based B2B e-commerce platform with a Next.js customer portal and account manager portal.
- Lead a distributed team of **4–8 full-stack engineers** across frontend, React Native, Odoo, and QA; own hiring, onboarding, code review, performance management, and engineering standards to keep delivery on schedule.
- Designed role-based access control, pricelist management, account-level reporting, and core B2B financial and accounting workflows in Odoo.
- Standardized a multi-environment **Odoo.sh release pipeline** across two teams — development, regression, UAT, and production — with GitHub Actions and Azure DevOps.
- Resolved production-critical issues, including a WebSocket frame-ordering fault in the client portal, and drove post-incident analysis and system hardening.
- Integrated AI-assisted development and workflow automation (LLM, CrewAI, n8n) into daily delivery, and introduced a weighted performance evaluation framework for the team.

Senior Software Engineer → Software Architect → Technical Team Lead — On-site, KSA — **2015 – 2025**

Placed under Qwaed Technologies and Genius Valley, delivering to their ministry, telecom, university, and healthcare clients. Senior Software Engineer (2015–2020) → Software Architect (2020–2023) → Technical Team Lead (2023–2025).

- Led architecture and delivery for the **Ministry of Interior, Ministry of Economy and Planning, STC, and King Saud University** across document management, visitor management, access control, and time & attendance systems.
- Delivered biometric time and attendance platforms at scale for King Saud University and STC, supporting **10,000 employees across 300 devices** and **500 employees across 50 devices** with reliable attendance capture and reporting.
- Built and published a **Saudi ZATCA e-invoicing module** on the Odoo App Store with **5,880 downloads**, plus an Egyptian Tax Authority compliance integration.
- Designed and packaged the **Access Management System (AMS)** suite on Odoo — visitor management, access control, time & attendance, MDU, secretary workflow, and IoT school sound systems — with a Docker-based client release pipeline.
- Led the delivery-stack migration from legacy C#/.NET and DevExpress XAF to Odoo/Python and modern JavaScript, setting architecture standards and code review culture.

- Mentored engineers on Odoo ORM, Python, and web architecture, and designed reusable integration patterns for Suprema biometric devices via the BioStar2 API.
- Ran requirements workshops and on-site UAT in Arabic and English, and presented technical trade-offs and delivery roadmaps to executive and operations leadership.

Software Engineer — Egypt **2014 – 2015**

- Built enterprise products in C#/.NET, DevExpress XAF, and SQL Server (MVVM) — a university laboratory system for Kafr El-Sheikh University, plus stock and property management platforms — with requirements gathered directly from stakeholders.

Earlier Career **2010 – 2014**

- **ACS (KSA-based group), Software Engineer — 2013–2014:** enterprise healthcare system modules in C#, Silverlight, WCF, and Oracle (MVVM, service-oriented integration).
- **Genius Making Center Academy, Software Developer — 2010–2013:** educational applications, 2D learning games, and administrative systems in C#/.NET and SQL Server, owning delivery end to end.
- **Republican Guard IT & Operations (military service), Programmer — 2011:** panorama, tracking, and internal IT applications.

SELECTED PROJECTS

SAMTIA — B2B E-Commerce Platform (KSA) | Architect & Team Lead **2025 – Present**

Odoo 18/19, Python, Next.js, TypeScript, PostgreSQL, Odoo.sh, Azure DevOps, Docker, GitHub Actions

Architected an Odoo + Next.js B2B commerce ecosystem integrating ERP, buyer portal, account-manager operations, pricing, orders, permissions, and reporting, delivered through a multi-environment release pipeline across two teams.

Access Management System (AMS) Suite | Architect & Team Lead **2024 – 2025**

Odoo, Python, OWL, JavaScript, PostgreSQL, React Native, Docker, BioStar2 API

Productized a modular Odoo suite (ams_base, ams_bs, ams_vm, ams_mep, OTP login) for visitor management, access control, time & attendance, MDU, and IoT school sound systems, with Suprema biometric integration and a Docker-based release pipeline.

Electronic Medical Record — BinRush Ophthalmic Center (KSA) | Architect & Team Lead **2020 – 2023**

Odoo, Python, JavaScript, OWL, PostgreSQL, NPHIES

Delivered a specialist ophthalmic EMR covering outpatient and inpatient workflows, patient records, and reporting, with insurance claims integrated through Saudi Arabia's NPHIES national health exchange.

Additional: Ministry of Interior iPad document & task management (C#/.NET, WCF, Ionic + Angular, 2020–2023) • Tayabat nutrition app (React Native, Expo, Supabase, Next.js, 2025–2026) • AI automation & RAG platform (n8n, CrewAI, LiteLLM, pgvector, 2025–2026)

SELECTED ENTERPRISE CLIENTS

Ministry of Interior (KSA) • Ministry of Economy and Planning (KSA) • Saudi Telecom Company (STC) • King Saud University • SAMTIA (KSA) • Advanced Photonix (KSA) • BinRush Ophthalmic Center / Ibn Rushd Medical Group • Kafr El-Sheikh University

EDUCATION & CERTIFICATION

AI Automation Certificate — Dotpy Academy | 2-month program: prompt engineering, n8n workflow design, no-code AI tooling

Professional Diploma, Software Development (9 months) — Information Technology Institute (ITI), Egypt | 2013

Pre-Master's Studies, Computer Science — Mansoura University, Egypt | 2012

BSc, Computer and Information Systems — Mansoura University, Egypt | 2010 • Final-year grade 90% • Graduation project: Face Recognition System (C#), IEEE contributor
